
PIYUSH PRAJAPATI

Software Developer | Full-Stack Developer | Backend & GenAI

+91 7039793720 | piyushprajapati0507@gmail.com | Mumbai, Maharashtra, India | github.com/Prajapati-Piyush
| linkedin.com/Prajapati-Piyush

PROFESSIONAL SUMMARY

Software Developer and Computer Science graduate focused on building modern full-stack and backend applications. Hands-on experience with Next.js, React, TypeScript, Node.js, Fastify, REST APIs, PostgreSQL, SQL, Redis, BullMQ, Docker, and GenAI application development. Experienced in designing APIs, data models, authentication flows, asynchronous background processing, responsive interfaces, and database-driven applications. Strong interest in building reliable, maintainable software and AI-powered products.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Fastify, Express.js, REST APIs

Database: PostgreSQL, SQL, MongoDB, Mongoose, Schema Design

AI & GenAI: LLM Integration, Prompt Engineering, AI API Integration, GenAI Applications

Async & Infrastructure: BullMQ, Redis, Background Workers, Schedulers/Cron, Docker

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Software Developer | Growve Technology Pvt Ltd

Contribute to full-stack software development with a focus on web applications, backend services, APIs, data handling, asynchronous workflows, and maintainable application architecture.

- Develop and maintain application features across frontend and backend layers using modern JavaScript/TypeScript technologies.
- Work with APIs, databases, background processing, and application workflows to deliver reliable product functionality.
- Apply clean coding practices, debugging, schema design, validation, and maintainable system structures during development.

KEY PROJECTS

CarCrafter - Vehicle Service Management System

Final Year Project | Full-Stack Web Application

- Developed an end-to-end vehicle service booking platform supporting customer and admin workflows, service selection, appointments, and booking management.
- Implemented authentication, service and booking flows, dynamic service data, database operations, and responsive interfaces.
- Technologies: Node.js, Express.js, MongoDB, Mongoose, EJS, JavaScript, Tailwind CSS.

VillaVista - Villa Booking System

Full-Stack Web Application

- Built a multi-role villa booking platform supporting customers, villa owners, and administrators with role-based application workflows.
- Implemented authentication, villa/facility management, image uploads, and database-backed booking functionality.
- Technologies: React, Node.js, MongoDB, JWT, Multer.

Real-Time Chat Application

Real-Time Web Application

- Built a real-time messaging application supporting text, image, and video sharing.
- Implemented real-time communication and authenticated user workflows using Socket.io and JWT.
- Technologies: React, Node.js, Socket.io, MongoDB, JWT.

EDUCATION

Bachelor of Science in Computer Science | SIES College of Arts, Science & Commerce, Mumbai | 2022-2025 | GPA: 8.9/10.0

HSC - Science Stream | P.A. Menon College, Mumbai | 2021-2022 | 78.20%

ADDITIONAL

Languages: English (Fluent), Hindi (Fluent)

Professional Interests: Full-Stack Engineering, Backend Systems, AI & GenAI Applications, APIs, Data Modeling, Asynchronous Processing
